

THE MATERIAL SERIES

CALCE · CORTILE · MALTA

At SNK Surfaces, every collection begins with material. The Material Series is inspired by architectural finishes that define Mediterranean and European-built environments—surfaces shaped by time, use, and craftsmanship rather than decoration. Each series takes its name directly from the material language it represents, creating a clear, honest connection between surface, texture, and application

MALTA
Mineral matter

CALCE

Lime-plaster inspired surfaces

CALCE is a refined clay surface inspired by the romantic softness of historic lime walls. Rooted in Mediterranean architectural heritage, its warm and tactile nature shapes calm spaces, bringing depth, soul, and subtle character. Evoking the timeless beauty of artisan craft.

- Soft, warm plaster effect
 - Subtle surface variations
 - Natural clay color palette
 - Mediterranean aesthetic

Design Applications

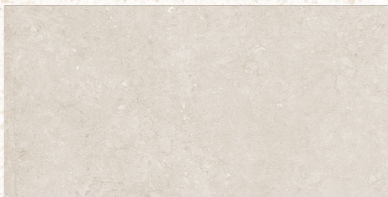

CORTILE

Refined urban concrete

Cortile captures the sophisticated beauty of contemporary urban architecture. Inspired by refined concrete surfaces, this collection brings industrial elegance and modern minimalism to residential and commercial spaces.

- Modern urban aesthetic
- Subtle concrete texture
- Contemporary color range
- Industrial sophistication

Design Applications

MALTA

Mineral matter surfaces

MALTA celebrates the raw materiality of mineral surfaces. Drawing inspiration from natural stone and aged mortar, this collection offers an authentic, textured aesthetic that brings depth and character to any space.

- Natural mineral texture
- Authentic aged appearance
- Rich tonal variations
- Rustic sophistication
